

IMEA's Goals

- To be the vehicle for linking local and global networks between practitioners, government and industry in its field of interest.
- To engage in learned society activities by way of organising conferences, specialist seminars and training courses and to strengthen relationships with similar bodies globally.
- To maintain the commitment and enthusiasm of members and celebrate their achievements.
- Through interaction with government and industry bodies, IMEA will consolidate a leadership role in the development and promotion of the materials and manufacturing professions, including the education of the profession and accreditation of courses.

Mission Statement...

IMEA is committed to developing the knowledge and skills of it's members to advance the field of Materials Technology and to support the wealth producing enterprises that depend on the application of this skill and knowledge.

What is IMEA?

The Institute of Materials Engineering Australasia Ltd is a technical society of the Institution of Engineers, Australia.

IMEA provides technical materials support to those in the materials engineering, manufacturing and research industries. This includes written information, training, conferences and seminars.

There are IMEA branches in Adelaide, Brisbane, Melbourne, Perth, Sydney & Wollongong. These branches are our local presence in your state and offer seminars, training and networking opportunities.

Incorporated in IMEA is the Engineering Materials Bookshop, a specialist 'virtual' bookshop stocking a wide range of materials engineering publications, CD-ROM's, videos and homestudy courses.

IMEA publishes a bi-monthly magazine, Materials Australia, specially compiled to provide the most up to date information in the field of materials engineering. It also publishes Materials Forum a CD-Rom annual refereed journal which addresses specific technical topics relevant to the industry.

IMEA conducts training courses designed to focus on specific industry related materials.

IMEA arranges conferences from major international forums to one-day seminars.

Who are our Members?

IMEA's individual and Company members in Australia and overseas are involved in materials science, technology and engineering. Members include manufacturing technical staff, professional engineers, academics, research scientists, technical sales staff and students. IMEA covers issues related to all aspects of materials including polymers, nano and bio materials, ceramics, metals and composites or their engineering applications.

Member Benefits

- Opportunity for IMEA members to electronically join the American society of Materials (ASM International) at a greatly discounted rate.
- IMEA Member Advantage discounts on a raft of financial and lifestyle products.
- Subscription to Materials Australia - a bi-monthly publication for professional materials engineers and others providing up to the minute information on industry, product, technical and research news.
- Advice on forthcoming conferences and training courses designed to facilitate continual professional development (CPD).
- Outstanding networking opportunities at technical and social meetings, conferences and training courses. A contact point for information about technical problems, jobs or projects.
- Discount admission for IMEA conferences and training courses.
- Discount on technical books, CD-ROM's, Videos and Home-study courses.
- Branch newsletters containing information on local activities and members.
- Opportunities for nomination to Standards Australia and other committees - your chance to contribute and make a difference in your industry.
